SHOW NAME, TITLE AND CORPORATION OF ADDRESSEE AND ADDRESSOR

TO: John Staples

DATE: December 4, 1970

FROM: Bill Graff

SUBJECT: Carton Bldg. Water Tank

The water hose running north east of the Carton Building as I guessed is a bleeder line. The interesting thing is that this bleeder is used to keep the main water line which runs north and south through the Mill from freezing. Obviously this water should not be running unless it is extremely cold for an extended period.

Bill Graff

BG/as

AL Sumner:

IT IS OBVIOUS THAT WE NEED TO HAVE A
PLAN FOR CONTROLLING "COLD WEATHER BLEEDER LINES".
I WOULD SUGGEST THAT YOUR PEOPLE GET TOGETHER
WITH BILL GRAFF AND SPOT BLEEDING ON A MAP,
WITH INSTRUCTIONS FOR DAILY CHECKS AND FOR TURNING
ON + OFF AS REQUIRED BY WEATHER CONDITIONS.
THE SAME SHOULD HOLD TRUE FOR HEATING EQUIPMENT
USED FOR WEATHER PROTECTION.
